

Automatic 8-Color Printer for Small Items

This small printer is designed for printing on wooden handicraft combs and other small items. It features 8-color synchronous printing, including white color, allowing for vibrant and detailed designs.

Product Overview

High-Efficiency 8-Color Printing Solution

This fully automatic printer is engineered for precise customization of small items, such as wooden handicraft combs. It features advanced 8-color synchronous printing capabilities, including white ink support, to ensure vibrant and highly detailed results. With one-button operation, the system supports flat, embossed, and glossy finishes, making it an ideal choice for businesses focused on professional small-scale production.
