

# Automatic Baby Formula Mixer

This automatic baby formula mixer simplifies baby feeding. It automatically mixes formula and water to the correct consistency and temperature, ensuring a safe and nutritious meal.

## ADDITIONAL IMAGES

## Product Overview

### Automated Feeding Solution

This automatic baby formula mixer is designed to streamline the feeding process by mixing and warming or cooling formula to the perfect consistency. It features a sophisticated magnetic mixing technique and a durable double-wall construction with a stainless steel interior. Beyond formula preparation, the device also includes a specialized function to disinfect pacifiers, ensuring a hygienic experience for your baby.

## Technical Specifications

Maximum Capacity	270 ml
Mixing Technology	Magnetic technique

## Design & Materials

### Construction

- Double wall design
- Stainless steel inner wall
- Plastic exterior

## Features

Additional Features	Warming, Cooling, Pacifier Disinfection
