

Automatic Bean-to-Cup American Coffee Maker

This bean-to-cup coffee maker is designed for brewing American-style coffee. It features adjustable brew strength and volume settings and includes an integrated grinder.

Overview

Fresh Bean-to-Cup Brewing

The H1500A is a versatile automatic coffee maker designed to deliver high-quality American-style coffee directly from whole beans. Featuring an integrated grinder and a thermal carafe, it ensures every cup is fresh and remains at the ideal temperature after brewing. With customizable strength and volume settings, it provides a tailored coffee experience for professional and home environments alike.
