

Automatic Bean-to-Cup American Style Coffee Maker

This automatic coffee maker freshly grinds beans for each brew. It features adjustable brew strength, a programmable timer, and a thermal carafe to keep coffee hot.

Overview

Professional American-Style Coffee Solution

This automatic bean-to-cup coffee maker is engineered to deliver high-quality American-style brewing with the convenience of a built-in grinder. Designed for professional environments and demanding users, it features a programmable auto-start timer and a thermal carafe to ensure fresh, hot coffee is available throughout the day. The intuitive digital interface allows for precise control over brew strength and timing, making it a versatile addition to any office or hospitality setting.
