

# Automatic Beer Bottle Filling and Capping Machine

This machine combines German technology with beer production characteristics to create small-scale beer filling equipment. It has rinsing, filling, cover screwing, and disinfection sterilization functions.

## ADDITIONAL IMAGES

## Overview

### Advanced Beer Bottling Solution

This automatic beer bottle filler integrates advanced technology with industry-standard production requirements, specifically designed for small to medium-scale brewery operations. The system offers high mechanical reliability, combining essential functions such as rinsing, precision filling, cap screwing, and sterilization into a single, efficient unit. It is engineered to streamline the bottling process while maintaining hygiene and product quality.

## Technical Specifications

### Model Configuration

Model	Washing Heads
DCGF14-12-4	14
DCGF18-18-6	18
DCGF24-24-8	24
DCGF32-32-10	32
DCGF40-40-12	40
DCGF50-50-15	50
DCGF60-60-18	60

## Features & Capabilities

### Construction

Stainless Steel

### Integrated Functions

Rinsing, Filling, Cover Screwing, Disinfection, Sterilization
