

Automatic Bottle Film Sealing Machine

This automatic bottle film sealing machine is designed for high-speed production lines. It features automated bottle feeding, filling, sealing, and discharge.

Product Overview

High-Speed Bottled Film Sealing Solution

This automatic bottled film sealing machine is engineered for high-speed production environments, offering a seamless workflow that includes automated bottle feeding, filling, sealing, and discharge. Constructed from durable stainless steel, it ensures high hygiene standards suitable for demanding industries. The system features precise control over sealing temperature and time, making it a versatile choice for various bottle sizes and film types.

Key Features

Automation Workflow

- Automated bottle feeding
- Automated filling
- Automated sealing
- Automated discharge

Suitable Industries

Food, Beverage, Pharmaceutical, Cosmetic

Construction Material

Stainless Steel

Safety & Control

Safety Mechanisms

Integrated Safety Systems • Operator Protection

Control Capabilities

- Precise sealing temperature adjustment
- Precise sealing time adjustment
