Overview

High-Efficiency Bottle Labeling Solution

This automatic labeling machine is engineered for precision and reliability in high-volume production environments. Constructed with durable #304 stainless steel and anodized aluminum, it ensures long-term hygiene and structural integrity. Featuring advanced PLC control and a user-friendly man-machine interface, it provides seamless operation for food, pharmaceutical, and chemical packaging lines.

Technical Specifications

Labeling Speed

25 m/min

Max Speed

Labeling Precision	1 mm
Power Requirements	600W / 220V / 50(60)Hz
Machine Dimensions (L*W*H)	2100 * 1000 * 1300 mm
Machine Weight	130 Kg

Labeling Capabilities

Label Roll Specifications

Parameter	Dimension
Inner Paper Roll Diameter	76 mm
Outer Paper Roll Diameter	< 360 mm
Bottom Paper Width	20 - 130 mm
Applicable Bottle Diameter	20 - 110 mm

Construction & Design

Construction Materials	#304 Stainless Steel, Anodized Aluminum Alloy
Control System	PLC control with man-machine interface
Conveyor Belt Width	101.6 mm

Applications

Suitable Industries

Food • Pharmaceutical • Cosmetics • Daily Chemicals
