

Automatic Bottle Labeling Machine for Edible Oils

This high-speed automatic labeling machine is designed for applying labels to edible oil bottles. It features stainless steel construction for durability and hygiene, and offers user-friendly operation with minimal maintenance.

Product Overview

High-Performance Labeling Solution

This automatic labeling machine is specifically engineered for the edible oil industry, ensuring precise label application on various bottle shapes and sizes. Constructed from durable stainless steel, it guarantees hygiene and longevity in high-volume production environments. The system features advanced sensors for bottle detection and adjustable conveyor speeds, offering a reliable and efficient solution for modern packaging lines.

Key Features

Compatibility

- Various bottle sizes
- Various bottle shapes
- Different label types
- Different label materials

Material	Stainless Steel
Capabilities	High-speed operation, Precise label placement, Adjustable conveyor speed, Bottle detection sensors

Performance Metrics

Operational Benefits

User-friendly • Minimal maintenance • Reliable • Efficient
