

# Automatic Bottle Shrink Wrapping Machine

This automatic shrink wrapping machine is designed for high-speed packaging. It features an integrated sealing and shrinking process, adjustable settings, and a temperature-controlled shrink tunnel.

## Overview

### High-Efficiency Shrink Wrapping Solution

This automatic bottle shrink wrapping machine is engineered for high-volume, continuous packaging operations, streamlining production with automated film sealing, cutting, and waste removal. Designed for versatility, it accommodates products of varying widths and heights, making it an ideal choice for industries ranging from pharmaceuticals and food to cosmetics and electronics. With its robust laser-cut steel frame, PLC control system, and integrated safety features, this machine ensures reliable performance and consistent packaging quality in automated lines.

## Key Features

### Safety Standards

Safety Switches • Protective Guarding

### Control System

PLC Controlled

### Automation Features

Automatic Film Sealing, Automatic Film Cutting, Automatic Scrap Wind-up

## Technical Specifications

### Sealing Technology

- Solid Seal Blades with Rounded Corners
- Adjustable Pin Perf for Air Evacuation

### Frame Construction

Laser Cut Steel with Durable Powder Coating

### Sensors

Horizontal & Vertical Eyes Standard

## Operational Versatility

### Primary Applications

- Pharmaceutical
- Food & Beverage
- Cosmetics
- Stationery & Printed Matter
- Electronics
- Toys

### Available Options

Cloaing Conveyor, Variable Speed
