

Automatic Cable Tie Wire Tying Machine

This automatic machine is widely used for tying cables in various industries, including wire harness and electronics. It solves the problem of low production efficiency in cable tie applications.

Overview

High-Efficiency Automatic Cable Tying

This fully automatic cable tie wire tying machine is engineered to streamline high-volume bundling operations across various industries, including electronics, home appliances, and automotive wire harnesses. By automating the tying process, this system significantly enhances production efficiency and reduces manual labor requirements. It is a robust solution designed for consistency and reliability in demanding factory environments.

Technical Specifications

Model Number	HWN-80
Power Supply	AC220V 50/60HZ
Rated Power	100 W
Cable Tie Scope	80 mm

Physical Attributes

Dimensions (LxWxH)	1350 x 550 x 810 mm
Total Weight	260 KG

Performance Data

Bundling Diameter Reference

Tie Length (mm)	Max. Bundle Diameter (mm)
80	12
100	18
120	22
140	28
150	30
160	32

Certifications & Warranty

Certifications	CE, SGS
Warranty	1 Year

Applications

Suitable Industries

Wire Harness • Electronics • Home Appliances • Micro-motor • Sensor Industry • Food Industry
