

Automatic Carton Erector

This automatic case erector is designed for high-speed carton forming. It features adjustable carton size, automated feeding, and taping for efficient case preparation.

Overview

High-Speed Automatic Case Preparation

This automatic carton erector is designed for high-speed carton forming, providing a consistent and efficient solution for industrial case preparation. The machine features automated feeding and taping capabilities, significantly streamlining the packaging process. Its robust construction ensures long-term durability and reliability even in the most demanding industrial environments.

Key Features

Core Features

- Adjustable carton size compatibility
- Automated carton feeding system
- Integrated taping mechanism
- User-friendly control panel for monitoring
- Heavy-duty industrial construction

Operational Capabilities

Automation Level

Fully Automatic • High-Speed • Integrated Taping

Control Interface

Dedicated control panel for operation and monitoring

Technical Specifications

Application Suitability

Carton Forming, Case Preparation, Industrial Packaging, High-Speed Lines

Build Quality

Robust industrial-grade construction for durability
