

Automatic Carton Sealing Machine

This machine automatically folds and seals the tops and bottoms of cartons simultaneously, saving labor and time. It accommodates various box sizes with quick adjustments and provides stable, consistent performance.

Overview

High-Efficiency Carton Sealing

This automatic carton sealing machine is designed to streamline packaging workflows with high-speed, reliable performance. Engineered for ease of use and simple maintenance, it incorporates international-standard components to ensure long-term durability. The system features advanced automatic right-angle correction, ensuring perfectly sealed boxes every time.

Key Features

Operational Capabilities

- Automatic right-angle correction for precise box alignment
- High-speed automated tape application
- Adjustable conveyor belts for versatile carton sizing
- Integrated automatic flap folding

Construction & Safety

Build and Safety Standards

Stainless Steel Construction, Safety Enclosures, Emergency Stop Equipped, Durable Design

Maintenance

Maintenance Level

Easy Maintenance • User-Friendly Operation

Components

Component Standards

Utilizes internationally recognized brand components for all major machinery parts.
