

Automatic Cartoning Machine for Medical Products

This automatic cartoning machine is a versatile solution for packaging medical and pharmaceutical products. It automates carton forming, product and leaflet insertion, and carton sealing.

Product Overview

High-Efficiency Medical Cartoning Solution

The WZH180 Automatic Cartoning Machine is a versatile, high-speed solution designed specifically for the pharmaceutical and medical packaging industry. It fully automates critical production steps including carton forming, product insertion, leaflet insertion, and final sealing. With a modular design and adjustable parameters, it ensures precise handling and seamless integration into existing production lines, while built-in safety interlocks prioritize operator protection.

Technical Specifications

Automation Functions

- Carton forming
- Product insertion
- Leaflet insertion
- Carton sealing

Model Number

WZH180

Features & Safety

Safety Systems

Safety Interlocks

Key Features

High-speed operation, Modular design, User-friendly interface, Adjustable parameters

Applications

Suitable Industries

Pharmaceutical, Medical Products
