

Automatic Cashew Nut Shelling Machine

This machine is an improved cashew nut shelling solution, designed for high efficiency and safety. It provides a high shelling rate, making it suitable for cashew nut processing.

Overview

High-Efficiency Automatic Cashew Shelling

This newly improved automatic cashew nut shelling machine is designed for high efficiency and a superior shelling rate while maintaining operator safety. It serves as an essential piece of equipment for cashew processing plants looking to automate their production line. The machine features a robust rack section, precise positioning devices, and an automatic feeding system to ensure consistent throughput with minimal manual intervention.

Performance Metrics

Performance Highlights

100 kg/h

Max Capacity

30 mm

Max Nut Size

0.75 kW

Power Rating

Technical Specifications

Model	FDDX-3
Capacity	80-100kg/h
Suitable Nut Size	20-30mm
Weight	200 kg
Dimensions	1000*700*900mm

Electrical & Control

Control System	Press Button
Voltage	380/220V, 50Hz

Machine Construction

Main Components

- Rack section
- Cashew positioning device
- Blade fixtures
- Transmission part
- Automatic feeding device
- Machine housing

Safety & Quality

Key Features

High Shelling Rate, High Efficiency, Safety Protection, Automatic Feeding
