

Automatic Cellophane Overwrapping Machine

This cellophane wrapping machine is designed for wrapping box-shaped items such as cosmetics, health care products, and audio-visual products. It is suitable for wrapping products with a square appearance in a box.

Product Overview

High-Efficiency Overwrapping Solution

This automatic cellophane wrapping machine is designed for the precise, high-speed overwrapping of box-shaped items including pharmaceuticals, cosmetics, food products, and consumer goods. It provides critical moisture protection and anti-counterfeiting benefits while enhancing the visual appeal and market value of packaged goods. Engineered for versatility, the system supports quick mold changes and includes advanced safety mechanisms to ensure operator protection and machine longevity.

Key Features

Operational Efficiency

- Rapid mold replacement time reduced to 30 minutes
- No need to regulate work top height during mold changes
- No disassembly required for material discharge chains or hoppers
- Unilateral hand swing device prevents adverse shaking
- Non-rotating hand wheel during operation for operator safety

Safety Systems

Double Safeguard Mechanism • Operator Protection Shield • Anti-Shaking Device

Applications

Compatible Products

- Perfume boxes
- Chewing gum
- Tea boxes
- Sugar packets
- Condoms
- Rubber products
- Mosquito-repellent incense
- Tape
- CD/VCD discs
- Playing cards
- Transparent soap
- Square batteries
- Floppy disks

Suitable Industries

Pharmaceutical, Food & Beverage, Health Care, Cosmetics, Audio-Visual, Industrial
