

Automatic Coaxial Cable Stripping Machine

This automatic machine precisely cuts and strips coaxial cables. It is designed to handle a wide range of cable diameters and stripping lengths with a user-friendly interface.

Product Overview

High-Precision Stripping Solution

The ZDBX-65A is an automatic coaxial cable cutting and stripping machine engineered for industrial-grade precision and high-efficiency production. Designed to handle a diverse range of coaxial cable diameters and stripping lengths, this unit integrates advanced sensors and sophisticated control systems to ensure consistent, accurate results. By minimizing material waste and streamlining operations, it serves as an essential tool for cable assembly, wire harness manufacturing, and complex electronics production environments.

Ideal Applications

Cable Assembly, Wire Harness Manufacturing, Electronics Production

Design and Build

Key Features

- Automatic cutting and stripping functionality
- User-friendly programming interface
- Robust industrial-grade construction
- Advanced sensor-driven precision control
- Designed for consistent accuracy and reduced waste
