

Automatic Coffee Maker with Integrated Grinder

This coffeemaker freshly grinds coffee beans for optimal drip-style brewing. Adjustable grind and cup settings allow for customized strength preferences.

Overview

Professional Automatic Coffee Maker

This automatic coffee maker features an integrated conical burr grinder, allowing for the freshest brew from whole beans. With a 10-cup capacity and a 24-hour programmable timer, it is designed for convenience in both office and home environments. The sleek stainless steel and plastic finish, combined with digital controls, ensures a modern look and precise operation.
