Overview

High-Efficiency Condiment Filling Solution

This automatic filling machine is engineered specifically for liquid and viscous condiment applications, such as soy sauce, cooking wine, vinegar, and sugar syrup. Designed for the food processing industry, it prioritizes corrosion resistance and hygiene while effectively managing common challenges like product foaming and dripping. The system ensures consistent filling volumes, minimizing waste and optimizing production efficiency.

Key Features

Operational Benefits

- Corrosion-resistant construction
- Advanced foam and drip control
- High-precision volume accuracy
- Easy cleaning and maintenance
- Integrated safety systems

Suitable Products

Soy Sauce, Cooking Wine, Vinegar, Sugar Syrup, Viscous Sauces

Technical Specifications

Safety Features

Safety Interlocks • Control Monitoring • Operator Protection

Construction Material

Stainless Steel

Design Type

Modular with automated bottle handling
