

Automatic Continuous Degaussing Machine

This automatic continuous degaussing machine is a medium destruction device. It can realize the continuous destruction of hard disks, magnetic tapes, magnetic cards, and magnetic storage media, with a processing capacity of 400 per hour.

Overview

Professional Industrial Degaussing Solution

The XBC-LX300 automatic continuous degaussing machine is a high-performance destruction device engineered for industrial-grade data security. It provides rapid, reliable sanitization of hard disks, magnetic tapes, and magnetic cards. Designed for continuous operation, this system is ideal for high-volume data destruction centers and quality-critical environments.

Performance Metrics

Processing Capacity

400 h

Units Per Hour

Technical Features

Integrated Monitoring Systems

- Perfect voltage monitoring
- Field intensity monitoring
- Degaussing failure sorting system

Compatibility

Supported Magnetic Media

Hard Disks, Magnetic Tapes, Magnetic Cards

Safety & Standards

Ideal Use Cases

Data Destruction Centers • Manufacturing • Maintenance • Quality Control
