

Automatic Cooking Oil Filling Machine

This automatic filling machine accurately dispenses cooking oil into bottles or containers. It features multiple filling heads, a conveyor system for automated bottle handling, and precise volume control.

Overview

Automated Cooking Oil Filling Solution

This automatic filling machine is engineered for the precise dispensing of various edible oils, including peanut, soybean, rapeseed, salad, sesame, and olive oils. Designed for medium to high-volume production lines, it features a conveyor system for automated bottle handling and multiple filling heads to maximize throughput. Constructed from durable stainless steel, the unit ensures hygiene and consistent fill levels while minimizing product waste.

Technical Specifications

Production Scale

Medium Volume • High Volume

Suitable Oil Types

Peanut Oil, Soybean Oil, Rapeseed Oil, Salad Oil, Sesame Oil, Olive Oil

Material

Stainless Steel

Key Features

Core Functionalities

- Automated conveyor system
- Multiple filling heads
- Precise volume control
- Adjustable settings for bottle sizes
- Adjustable settings for oil viscosities
