

# Automatic Cup and Box Sealing Machine

This automatic machine is designed for sealing both cups and boxes in high-volume production environments. It features a stainless steel construction for durability and incorporates a PLC for precise control of sealing parameters.

## Product Overview

### High-Efficiency Sealing Solution

This automatic cup and box sealing machine is engineered for high-volume production environments, prioritizing both durability and hygiene through its robust stainless steel construction. It utilizes an advanced programmable logic controller (PLC) to provide precise command over critical sealing parameters like temperature, pressure, and dwell time. Designed for versatility and safety, the system integrates automated sensors to ensure consistent output while protecting operators with emergency stops and safety guards.

## Technical Specifications

Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Adjustable Sealing Parameters	Temperature, Pressure, Dwell Time

## Features & Capabilities

### Automation & Safety

- Automated cup/box presence sensors
- Emergency stop mechanism
- Safety guards
- Adjustable settings for varied sizes

## Industry Applications

### Suitable Industries

Food • Beverage • Pharmaceutical
