

Automatic Cup and Container Sealing Machine

This automatic packaging machine seals cups and containers. It features automated film feeding and cutting, precise temperature control, and adjustable sealing pressure.

Product Overview

High-Efficiency Sealing Solution

This automatic cup and container sealing machine is engineered for reliability and precision in high-volume packaging environments. Featuring robust stainless steel construction, it ensures durability and hygiene standards required for food and beverage applications. The system integrates automated film feeding, precise temperature control, and adjustable sealing pressure to deliver consistent, high-quality seals for various container types.

Technical Specifications

Suitable Applications

- Food packaging
- Beverage packaging
- Container sealing

Construction Material	Stainless Steel
Automation Features	Automated film feeding, Automated cutting, Precise temperature control, Adjustable sealing pressure

Customization

Customization Options

- Customizable mold sizes
- Adjustable production speeds
