

Automatic Cup and Tub Filling Sealing Machine

This automatic packaging machine is designed for filling and sealing pre-formed containers. It is suitable for packaging food, beverages, and pharmaceuticals in cups or tubs.

Overview

High-Efficiency Packaging Solution

This automatic cup and tub filling and sealing machine is engineered for precision packaging of diverse products, including food, beverages, and pharmaceuticals. Featuring a robust stainless steel construction, it integrates a container feeding system, filling station, and sealing station into a compact, automated unit. It is designed to streamline production lines by handling pre-formed containers with consistent reliability.

Technical Details

Automation Level

Automatic

Construction Material

Stainless Steel

Applications

Suitable Industries

Food, Beverage, Pharmaceutical

System Components

Key Components

- Container feeding system
- Filling station with hopper
- Sealing station
- Control panel
