

Automatic Cup Filling and Sealing Machine

This automatic cup filling and sealing machine is designed for filling and sealing liquids or semi-liquids in cups. It offers high stability and a long service life.

ADDITIONAL IMAGES

Overview

Fully automated filling and sealing station for efficient production.

High-Speed Automated Packaging

This fully automatic cup filling and sealing machine is a multifunctional, high-speed solution engineered for liquid and semi-liquid products. Designed for durability and stability, it ensures consistent packaging quality for items like mineral water, fruit juice, yogurt, jelly, and pudding. Its robust construction and automated process make it an ideal choice for food and beverage manufacturers looking to enhance production efficiency.

Machine Specifications

Automated multi-lane configuration designed for high-volume food packaging.

Production Speed

800 cups/h

Max Speed

Model	ORJ900
Filling Accuracy	±1%
Compatible Sealing Materials	PP, PE, PET

Technical Details

Power Supply	220V/50HZ
Power Consumption	1.7 KW
Air Pressure	0.5-0.7MPa
Heat Sealing Temperature Range	0-400

Physical Dimensions

Dimensions (L x W x H)	1000 x 1000 x 1500 mm
Weight	350 KG
