

Automatic Cylindrical Container Labeling Machine

Automatic labeling machine designed for applying labels to cylindrical containers. Constructed from stainless steel for durability and hygiene, it is suitable for high-speed production lines in various industries.

Product Overview

High-Efficiency Labeling Solution

This automatic labeling machine is engineered specifically for the precise application of labels onto cylindrical containers. Constructed from durable stainless steel, it ensures hygiene and longevity in demanding production environments. The system integrates a label roll dispenser, a reliable conveyor, and an intuitive control panel, making it an ideal choice for high-speed automated packaging lines.

Technical Specifications

Construction Material	Stainless Steel
Application Type	Cylindrical Containers, Automatic

Key Features

Core Components

- Label roll dispenser
- Conveyor transport system
- Precision labeling mechanism
- Adjustable control panel

Industry Suitability

High-speed production • Automated lines • Food & Beverage • Cosmetics
