

Automatic Dumpling and Samosa Forming Machine

This machine creates dumplings, spring rolls, and samosas by using different molds. The resulting products are suitable for boiling, frying, steaming, or freezing.

Overview

Versatile Automatic Forming Solution

This automatic forming machine is designed to streamline the production of dumplings, spring rolls, samosas, and wontons. Constructed from durable, food-safe stainless steel, it features a compact footprint suitable for hotels, canteens, and food processing facilities. The system utilizes dual hoppers for dough and filling, allowing for adjustable skin thickness and consistent output quality.
