

Automatic Edge Banding Machine for Woodworking

This automatic edge banding machine is designed for precise and efficient woodworking applications. It features an integrated edge tape dispenser, a hot air gun for activating the adhesive, and a trimming unit for a clean finish.

Product Overview

Professional Edge Banding Solution

The MT983 is an automatic edge banding machine specifically engineered for precision woodworking environments. This system features an integrated edge tape dispenser and a professional-grade hot air gun for rapid adhesive activation. Its robust design incorporates a high-efficiency trimming unit to ensure a clean, seamless finish on every workpiece, making it an essential asset for high-quality furniture production.

Technical Specifications

Target Industry

Professional Woodworking • Furniture Manufacturing

Model Number

MT983

Key Functional Components

Edge Tape Dispenser, Hot Air Adhesive Activation, Integrated Trimming Unit
