

Automatic Electric Coffee Machine

This electric coffee machine features automatic grinding, brewing, slag removal, and cleaning functions. It utilizes high-pressure steam extraction and is compatible with both coffee beans and coffee powder.

Overview

Professional Automatic Coffee Experience

This automatic coffee machine offers a seamless brewing experience with integrated bean grinding, brewing, slag disposal, and self-cleaning functions. Designed for versatility, it supports both coffee beans and powder, allowing users to customize coffee temperature, flow rate, and grind settings. With its microcomputer control and heat preservation features, it ensures consistent quality and convenience for any professional or office environment.

Technical Specifications

Power Consumption	1200 W
Pump Pressure	15 bar
Water Tank Capacity	1.5 L

Key Features

Automation Capabilities

- Automatic bean grinding
- Automatic brewing
- Automatic slag disposal
- Automatic cleaning cycle

Coffee Compatibility

Whole Beans • Ground Coffee • ESE Pods

Adjustable Parameters

Coffee Temperature, Flow Rate, Powder Amount, Grind Degree

Operational Details

Safety & Efficiency

- Automatic shut-off function
- Heat preservation function

Control System

Microcomputer control with digital display
