

Automatic Electric Folding Step for Buses

This electric folding step is designed for convenient and safe bus passenger access. It features durable aluminum construction and a non-slip surface, automatically extending and retracting with the bus door.

Product Overview

Automatic Electric Folding Step

This electric folding step is engineered to provide safe and convenient passenger access for various bus models. Constructed with durable aluminum and featuring a non-slip surface, it ensures long-lasting performance and enhanced safety. The system is designed for seamless integration, automatically extending and retracting in synchronization with the bus door operation.

Technical Specifications

Performance

- Robust motor
- Reliable mechanism
- Smooth operation
- Quiet operation

Material

Aluminum

Safety Features

Non-slip surface, Automatic operation

Operation

Automatic extension and retraction synchronized with bus door
