

Automatic Espresso Machine with Milk Frother

This automatic espresso machine is designed for home use and features a bean-to-cup system for brewing fresh espresso from whole beans. It includes a built-in grinder, milk frothing attachment, and adjustable settings for coffee strength and volume.

Product Overview

Professional Bean-to-Cup Experience

This fully automatic espresso machine offers a seamless bean-to-cup brewing process designed for premium quality results. It features an integrated grinder and advanced pre-infusion technology, ensuring every cup is crafted with precision. With its intuitive digital interface and customizable strength and volume settings, it provides a versatile solution for crafting cappuccinos, lattes, and classic espresso.
