Product Overview

Professional External Vacuum Packaging

The external vacuum packaging machine is a versatile, compact solution designed for horizontal vacuum sealing. Featuring an adjustable stainless steel working platen, it accommodates objects of varying thicknesses with ease. Controlled by a precise microcomputer system, the unit offers both manual and foot-switch operation, making it ideal for packaging electronics, semiconductors, metal parts, and textiles.

Technical Specifications

Safety Features

Double Protection • Automatic Alarm • Emergency Stop

Optional Functionality

- Inflation function
- Double-sided heating

Control System

Microcomputer board

Operation Modes

Manual, Automatic, Foot Switch

Applications

Suitable Industries

- Electronics (wafers, semiconductors, ICs)
- Metal processing parts
- Textiles and cotton wool products

Benefits

Reduced Volume, Freshness Preservation, Impact Resistance
