

Automatic Filling and Capping Machine

This automatic filling and capping machine is designed for the food, beverage, and cereal industries. It features a stainless steel construction for hygiene and durability.

Product Overview

High-Efficiency Filling and Capping Solution

This automatic filling and capping machine is engineered specifically for the food, beverage, and cereal industries. It features a robust stainless steel construction that ensures high hygiene standards and long-term durability in demanding production environments. With its integrated rotary filling system and automated capping mechanism, it provides precise dispensing and secure closure for high-volume production lines.

Technical Specifications

Construction Material	Stainless steel
Filling System	Rotary filling system
Automation Features	Automatic Filling, Automated Capping

Application Suitability

Target Industries

- Food Industry
- Beverage Industry
- Cereal Processing

Production Capacity

High-volume production
