

# Automatic Filling and Capping Machine

This automatic machine integrates filling and capping processes. It is designed for high-speed production lines, ensuring precise filling volumes and secure container closures.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Monobloc Solution

This automatic filling and capping machine is engineered for high-speed production environments, integrating both processes into a single, compact unit. Constructed from durable stainless steel to ensure hygiene and longevity, it offers precise volume control through multiple filling heads. Designed for seamless operation, it features a user-friendly control panel, making it an ideal solution for beverage, pharmaceutical, and liquid product packaging lines.

## Technical Standards

### Certification Details

Metric	Details
Certificate Number	M.2020.206.C5739
Initial Assessment	21.04.2020
Expiry Date	21.04.2025

### Compliance & Standards

CE, 2006/42/EC, EN ISO 12100:2010, EN 12463:2004+A1:2011, EN 1672-2:2005+A1:2009, EN 60204-1:2018

## Machine Features

### Key Benefits

- Integrated filling and capping process
- High-speed production capability
- Precise volume control
- Secure container closure
- User-friendly control interface

Material	Stainless Steel
Machine Configuration	Monobloc (Integrated Filling & Capping)
