

Automatic Flexible Material Printer

This printer is designed for high-speed and precise printing on various flexible materials. It features automatic tension control and a user-friendly interface for easy operation.

Overview

High-Efficiency Flexible Material Printing

The RY-320 is a professional-grade, fully automatic printer engineered for high-speed and precision output on flexible substrates. Designed for versatility, it excels in label and packaging production environments. The system incorporates advanced tension control and multi-station color configuration to ensure consistent quality and ease of operation.

Technical Specifications

Automation Level

Full-Automatic

Model

RY-320

Key Features

Key Features

- Automatic tension control system
- Multiple printing stations for multi-color output
- User-friendly interface for monitoring
- High-speed precision performance

Applications

Suitable Applications

Label Printing, Packaging, Flexible Materials
