Product Overview

Industrial Flour Milling Solution

This high-performance, automatic flour milling system is designed for large-scale industrial production. The turnkey solution supports diverse grain processing, including wheat, maize, and corn, and is capable of producing various flour types such as NShima and Ugali. With a modular design, it ensures consistent output quality, while comprehensive support services facilitate seamless installation and efficient long-term operation.

Processing Capabilities

Supported Grains

Wheat, Maize, Corn

Flour Varieties

NShima Flour, Ugali Flour, Injera Flour, General Purpose Flour

System Features

System Features

- Automatic flour packing integration
- Multi-stage sifting and purification
- Pneumatic conveying system
- Modular design for scalability
- Emergency stop safety controls

Services and Warranty

Service Package

- Turnkey project design
- On-site installation
- Commissioning services
- Worker training
- Lifelong technical support

Warranty Terms

1 Year

Quality Guarantee

1 Year
