

Automatic Fuel Dispensing Nozzle

This automatic fuel dispensing nozzle ensures safe and efficient fuel transfer. The nozzle features an automatic shut-off to prevent overfilling, a swivel inlet for flexible hose attachment, and ATEX certification for safe use in explosive environments.

Product Overview

Professional Fuel Dispensing Solution

The XIDE-120 is an automatic fuel dispensing nozzle engineered for safe and efficient fuel transfer in demanding environments. It features a robust metallic body for long-term durability and an ergonomic design that includes an easy-grip handle. Equipped with an automatic shut-off mechanism, this nozzle reliably prevents overfilling and accidental spillage during operation.
