

Automatic Granular Product Packaging Machine

This automatic machine is designed for the efficient and precise packaging of granular products. It automates package forming, filling, and sealing, ensuring consistent quality and high throughput.

Overview

High-Efficiency Granular Packaging

This automatic multi-function packaging machine is engineered for the precise and efficient handling of granular products. Designed with a focus on consistency and throughput, it automates the entire process of forming, filling, and sealing packages. Its robust stainless steel construction ensures durability and compliance with hygiene standards, making it an ideal solution for the food, pharmaceutical, and chemical industries.

Technical Specifications

Automation

Fully Automatic • Form-Fill-Seal

Material

Stainless Steel

Key Features

Operational Benefits

- User-friendly control panel
- Modular design for quick changeovers
- Compact footprint for flexible installation
- Advanced sensor-based filling accuracy
- High-reliability sealing system

Performance Metrics

Performance Indicators

200 pcs/min

Throughput Capacity

Applications

Suitable Industries

Food Industry, Pharmaceuticals, Chemical Industry
