Overview

High-Efficiency Granule Packaging Solution

This automatic granule packaging machine utilizes a vertical form-fill-seal (VFFS) system to provide precise and efficient packaging for a wide range of granular materials. Constructed from durable stainless steel, it ensures high standards of hygiene and long-term reliability for food, chemical, and pharmaceutical applications. The system features an integrated PLC control panel for easy parameter adjustments, including bag size and filling volume, ensuring consistent sealing and accurate weight control.

Technical Specifications

Filling System	Volumetric dosing system
Machine Type	Vertical Form-Fill-Seal (VFFS)
Construction Material	Stainless steel

Key Features

Key Capabilities

- Adjustable bag length and width
- Heat sealing mechanism for airtight seals
- Precise weighing and filling
- Easy maintenance access

Control System	Programmable Logic Controller (PLC)
Suitable Materials	Food products, Chemicals, Pharmaceuticals, Seeds, Grains, Small hardware
