Product Overview

High-Efficiency Granule Packaging

This automatic granular packaging system is engineered for high-speed, precise filling and sealing of granular materials. Featuring a robust all-mechanical design, the system is built for long-term reliability and durability in demanding production environments. Its advanced rotary sealing mechanism ensures tight, consistent, and aesthetically pleasing seals for a wide range of single-serving packets and stick packs.

Performance

Packaging Speed

160 bags/min
Maximum Speed

Expected Service Life

12 years

Technical Specifications

System Features

- Computerized control system
- Rotary sealing mechanism
- Integrated film roll holder
- Filling hopper
- Discharge chute
- Mobile design with wheels

Power Supply

AC220V

Construction

Stainless Steel

Applications

Suitable Granular Products

Coffee, Sweeteners, Flavored Drink Mixes, Sugar, Granulated Materials
