

Automatic Hand Dryer

This automatic hand dryer is suitable for installation in public restrooms, hotels, restaurants, airports, and office buildings. It uses an infrared sensor for automatic activation, providing a hygienic and efficient hand-drying experience.

Product Overview

Professional Automatic Hand Dryer

This high-performance automatic hand dryer is designed for efficient and hygienic use in demanding commercial environments. Controlled by advanced SCM technology, it features a precise 0.5-second sensor delay to prevent accidental activation and includes an automatic shut-off function after one minute of continuous operation. Built for safety and reliability, the unit is equipped with robust protection against overheating and overcurrent, making it an ideal solution for high-traffic public facilities like airports, hospitals, hotels, and office buildings.

Technical Specifications

Sensor Delay Time	0.5 s
Automatic Shut-off Limit	1 min

Safety & Features
