Overview

High-Efficiency Tipping Solution

This fully automatic tipping machine is engineered for the precise and rapid processing of handbag and shopping bag ropes. Designed for industrial-scale manufacturing, it streamlines the tipping process to ensure consistent, high-quality results across various rope materials. With a robust build and high production capacity, this machine is an ideal asset for manufacturers looking to enhance productivity while maintaining strict quality standards.

Technical Specifications

Company Show

High-performance automatic tipping machine designed for textile and apparel manufacturing environments.

Performance Metrics

4250 pcs/hour

Production Capacity

0.75 kW

Power Rating

650 kg

Machine Weight

Operating Parameters

- Rope Length: 30cm - 80cm
- Power Supply: Three Phase
- Dimensions: 1400cm x 130cm x 1500cm

Compliance and Service

Service & Quality

- Pre-delivery quality inspection included
- Overseas service available through international agents

Certifications

CE

Logistics

Shipping & Lead Times

Order Quantity	Packing Method	Delivery Time
Under 10 sets	Single wooden case	20 days
10 sets or more	Full container	30 days
