

Automatic Hanging Dry Powder Fire Extinguisher

This hanging fire extinguisher automatically discharges dry powder to suppress fires. It is designed for ceiling mounting in enclosed spaces such as machinery and electrical rooms.

Product Overview

Automatic Fire Suppression System

This automatic hanging dry powder fire extinguisher is specifically engineered for reliable fire suppression in enclosed environments. Its ceiling-mounted design ensures optimal coverage for critical areas, providing an essential safety layer for machinery and electrical rooms. The unit features an integrated pressure gauge for easy monitoring, ensuring the system remains ready for immediate deployment against Class A, B, and C fires.

Technical Details

Monitoring Features

Pressure Gauge

Fire Class Compatibility

Class A, Class B, Class C

Mounting Style

Ceiling-mounted
