

Automatic Horizontal Flow Wrapper

This automatic horizontal flow wrapper is designed for high-speed packaging of various products. It forms, fills, and seals packages from a roll of film using advanced control systems for precise operation.

Product Overview

High-Performance Horizontal Flow Wrapper

The XZB450 is a sophisticated automatic horizontal flow wrapper engineered for high-speed, reliable packaging across various industries including food, confectionery, and hardware. It utilizes a precision form-fill-seal process that ensures consistent product wrapping from a roll of film. With its robust stainless steel construction and advanced digital control interface, this machine offers both durability and ease of operation for demanding industrial environments.

Technical Capabilities

Key Performance Metrics

450

Model Series Designation

Suitable Applications

Food Products, Confectionery, Hardware, Consumer Goods

Equipment Features

Main Components

- Product feeding conveyor
- Adjustable forming box
- Rotary sealing jaws
- Advanced film feeding control system
- Automatic film splicing unit

Build Material

Stainless Steel

Operation & Control

Operator Interface

- User-friendly parameter setting interface
- Real-time production monitoring
- Precise sealing temperature control
- Adjustable package size configuration
