

# Automatic Horizontal Paper Tube Seaming Machine

This horizontal seaming machine is designed for the automatic sealing of paper tubes with end caps. The machine features a five-workstation dial controlled by a computer system for precise indexing and continuous operation.

## Product Overview

### High-Efficiency Paper Tube Seaming

The automatic horizontal paper tube seaming machine is designed for high-speed, reliable sealing of paper packaging. It automates the tube feeding, discharging, and cap feeding processes to maximize production output. With a user-friendly design and robust build, it ensures consistent sealing quality while requiring only one operator.

## Technical Specifications

### Production Efficiency

**38 pcs/min**

Max Output

**3 ‰**

Max Reject Rate

### Compatible Tube Sizes

Dimension	Range
Diameter	30 - 160 mm
Length	70 - 400 mm

## Operational Requirements

### Power and Air

- Total Power: 2.6 kW
- Voltage: 3-phase 380V
- Air Pressure: 0.4 MPa

### Automation Capabilities

Automatic Feeding, Automatic Discharging, Automatic Cap Feeding
