

Automatic Hot Stamping Coding Machine

This automatic coding machine prints production dates and batch numbers onto packaging. It uses adjustable temperature and speed controls to ensure optimal printing on labels, pouches, and other materials via hot stamping.

Overview

Automatic Hot Stamping Coding Machine

This automatic coding machine is engineered for precision printing of production dates, batch numbers, and essential information onto diverse packaging materials including pouches and labels. Utilizing a reliable hot stamping method, it delivers clear, durable, and professional-grade imprints. With adjustable temperature and speed controls, this unit ensures optimal printing quality across various substrates, making it an ideal solution for the food, pharmaceutical, and cosmetic industries.

Technical Features

Printing Method	Hot Stamping
Control Features	Adjustable Temperature, Adjustable Speed

Applications

Suitable Industries

Food Industry • Pharmaceutical Industry • Cosmetic Industry

Compatible Packaging

- Labels
- Pouches
- Various Packaging Materials
