

# Automatic Industrial Washing Machine

This automatic industrial washing machine is designed for heavy-duty laundry applications. It features a stainless steel construction, programmable wash cycles, and precise temperature control for optimal cleaning.

## Overview

### Industrial Cleaning Performance

The XGQ-130 F is a robust and efficient automatic industrial washing machine engineered for high-volume, heavy-duty laundry applications. Constructed with premium stainless steel, it ensures long-term durability and strict adherence to hygiene standards in professional environments. The machine features advanced programmable wash cycles and precise temperature control, providing consistent and reliable results for sectors such as hospitals, hotels, and large-scale commercial laundries.

## Technical Specifications

Material	Stainless Steel
Control System	Programmable interface

## Performance

### Key Capabilities

- Precise temperature control
- High-capacity drum
- Powerful extraction motor
- Programmable wash cycles

## Application

Suitable Industries	Hospitals, Hotels, Commercial Laundries
