

Automatic Industrial Washing Machine

This automatic industrial washing machine is designed for heavy-duty laundry applications. The machine features a stainless steel drum and advanced control systems for precise temperature and cycle management.

Overview

Professional Industrial Laundry Solution

The XGQ-100 F is a robust and efficient automatic industrial washing machine designed for heavy-duty laundry applications. Built with a durable stainless steel drum, it ensures longevity and superior resistance to corrosion in demanding environments. This unit integrates advanced control systems for precise temperature and cycle management, significantly optimizing both washing performance and utility consumption.

Key Performance Metrics

Operational Performance

100 kg

Drum Capacity

Construction & Design

Material Specifications

Stainless Steel Drum, Heavy-duty Construction, Corrosion Resistant

Operational Features

Installation Mode

Offline Operation

Control System

Advanced automatic control for temperature and cycle management

Target Applications

Suitable Industries

- Hospitals
- Hotels
- Commercial Laundries
