

Automatic Juice Filling Machine

This automatic juice filling machine is designed for efficient juice production. It features a multi-head filling system with stainless steel components.

Overview

Automatic Juice Filling System

This advanced rinsing-filling-capping tribloc system is designed for the efficient processing of fruit juices, including orange, pineapple, and mango varieties. Constructed with high-grade SUS304 stainless steel, it ensures hygiene and durability with no process blind angles for easy cleaning. The system features PLC-controlled operation with a touch screen interface, offering high filling accuracy and flexible bottle handling.

Technical Specifications

Machine Type	Rinsing-Filling-Capping Tribloc
Material	SUS304 Stainless Steel
Drive Type	Pneumatic
Power	> 4KW
Application	Beverage, Orange Juice, Pineapple Juice, Mango Juice, Pulp Juice

Performance

Production Capacity

24000 BPH

Max Capacity

Model Specifications
