Product Overview

Precision Liquid Packaging Solution

This automatic packaging machine is engineered specifically for liquid and sauce products, offering a versatile solution for creating special-shaped packages. Constructed with durable stainless steel, it ensures high hygiene standards and long-term reliability in food and beverage production environments. The system integrates precise volume control and advanced sealing technology to guarantee leak-proof, high-quality packaging for every unit.

Technical Specifications

Construction Material	Stainless Steel
Filling System	Adjustable volume control for accurate dosing
Sealing Type	Leak-proof sealing system
Operation	Integrated control panel for monitoring

Applications

Packaging Examples

Product Type	Typical Fill Weight
Red Ginseng Extract	10g
Tomato Ketchup	12g
Suitable Products	Liquids, Sauces, Extract Drinks, Condiments
