

Automatic Liquid Filling, Capping, and Labeling Machine

This automatic machine integrates filling, capping, and labeling functions for liquid products. It features stainless steel construction, a PLC, multiple filling heads, adjustable bottle guides, and a touchscreen interface.

Overview

High-Efficiency Liquid Packaging Solution

This automatic bottling machine integrates filling, capping, and labeling processes into a single, streamlined system. Built with durable stainless steel for optimal hygiene, it features a programmable logic controller (PLC) and a user-friendly touchscreen interface for precise, reliable operation. Designed for versatility and speed, this machine is an ideal solution for food, beverage, pharmaceutical, and chemical manufacturing.

Technical Specifications

Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Interface	Touchscreen

Operational Features

Suitable Industries

- Food & Beverage
- Pharmaceutical
- Chemical

Flexibility

Adjustable Bottle Guides

Core Functions	Filling, Capping, Labeling
----------------	----------------------------
